ENTERPRISE RESOURCE PLANNING (ERP)
GOVT. HNAHTHIAL COLLEGE (2023-2024)

Govt. Hnahthial College centrally manages almost all aspects of its operations, including student records, exams, finances, attendance, and other administrative tasks, essentially integrating different departments within the college through a single platform to streamline data access and improve efficiency; essentially acting as a centralized management system for the college.

Key points about Govt. Hnahthial College ERP:

1. **Centralized data:**
   All student information, academic records, fees, attendance, and disciplinary actions are stored in one system, allowing easy access for faculty and administration.

2. **Improved communication:**
   Different departments within the college can readily share information through the ERP, facilitating better coordination and decision-making.

3. **Reporting and analysis:**
   The system can generate reports on various aspects of college operations, providing insights for better planning and management.

Typical modules in a PUC ERP might include:

- **Faculty Management:** Managing faculty details, academic records etc.

- **Exam Management:** Scheduling exams, generating results, grading, and publishing marks

- **HR Management:** Staff details, payroll, leave management

- **Library Management:** Book inventory, circulation, and user access.
